

FREE HAY ANALYSIS

Join us on Thursday, Oct 19th, 6PM at Andy's Agway on River Road in Dayton for a FREE hay analysis and talk on pasture management. We'll provide the pizza!

HAY SAMPLES DUE OCT 5TH at Andy's Agway

Have you ever wondered about the quality of your hay, and how it impacts your horse's diet? Is your horse getting enough calories and nutrients from his hay? Do you have questions about pasture management, or are you thinking about re-planting your pasture?

Join us on Oct 19th to get your hay results!

13 Cole Farm Rd (off River Rd) Dayton ME 04005

How to Collect a Hay Sample:

The ideal sample is obtained using a hay probe to collect a core sample (if possible). If you do not have a hay probe available we recommend the following:

Instructions:

- Collect equal parts of the stalk, stem & leafy material in the hay sample.
- FILL a (1) gallon clear plastic bag with your hay sample - bag must be sealed.
- Label your sample with your:
 - NAME AND ADDRESS
 - PHONE NUMBER
 - TYPE OF HAY

Small Square Bale Samples:

- Collect the sample(s) from the center of the hay bale
- Collect sample(s) from (3) three or more hay bales, if possible
- Combine all samples collected

Round Bale Samples:

- Collect the sample(s) from the center of the round bale
- Collect sample(s) from (2) two or more round bales, if possible
- Combine all samples collected

If you have any other questions about collecting your hay sample or Nutrena's FREE hay testing, feel free to call Nutrena directly at 877-394-4771.
